

# Transform Shopping Experience with AI Chatbots

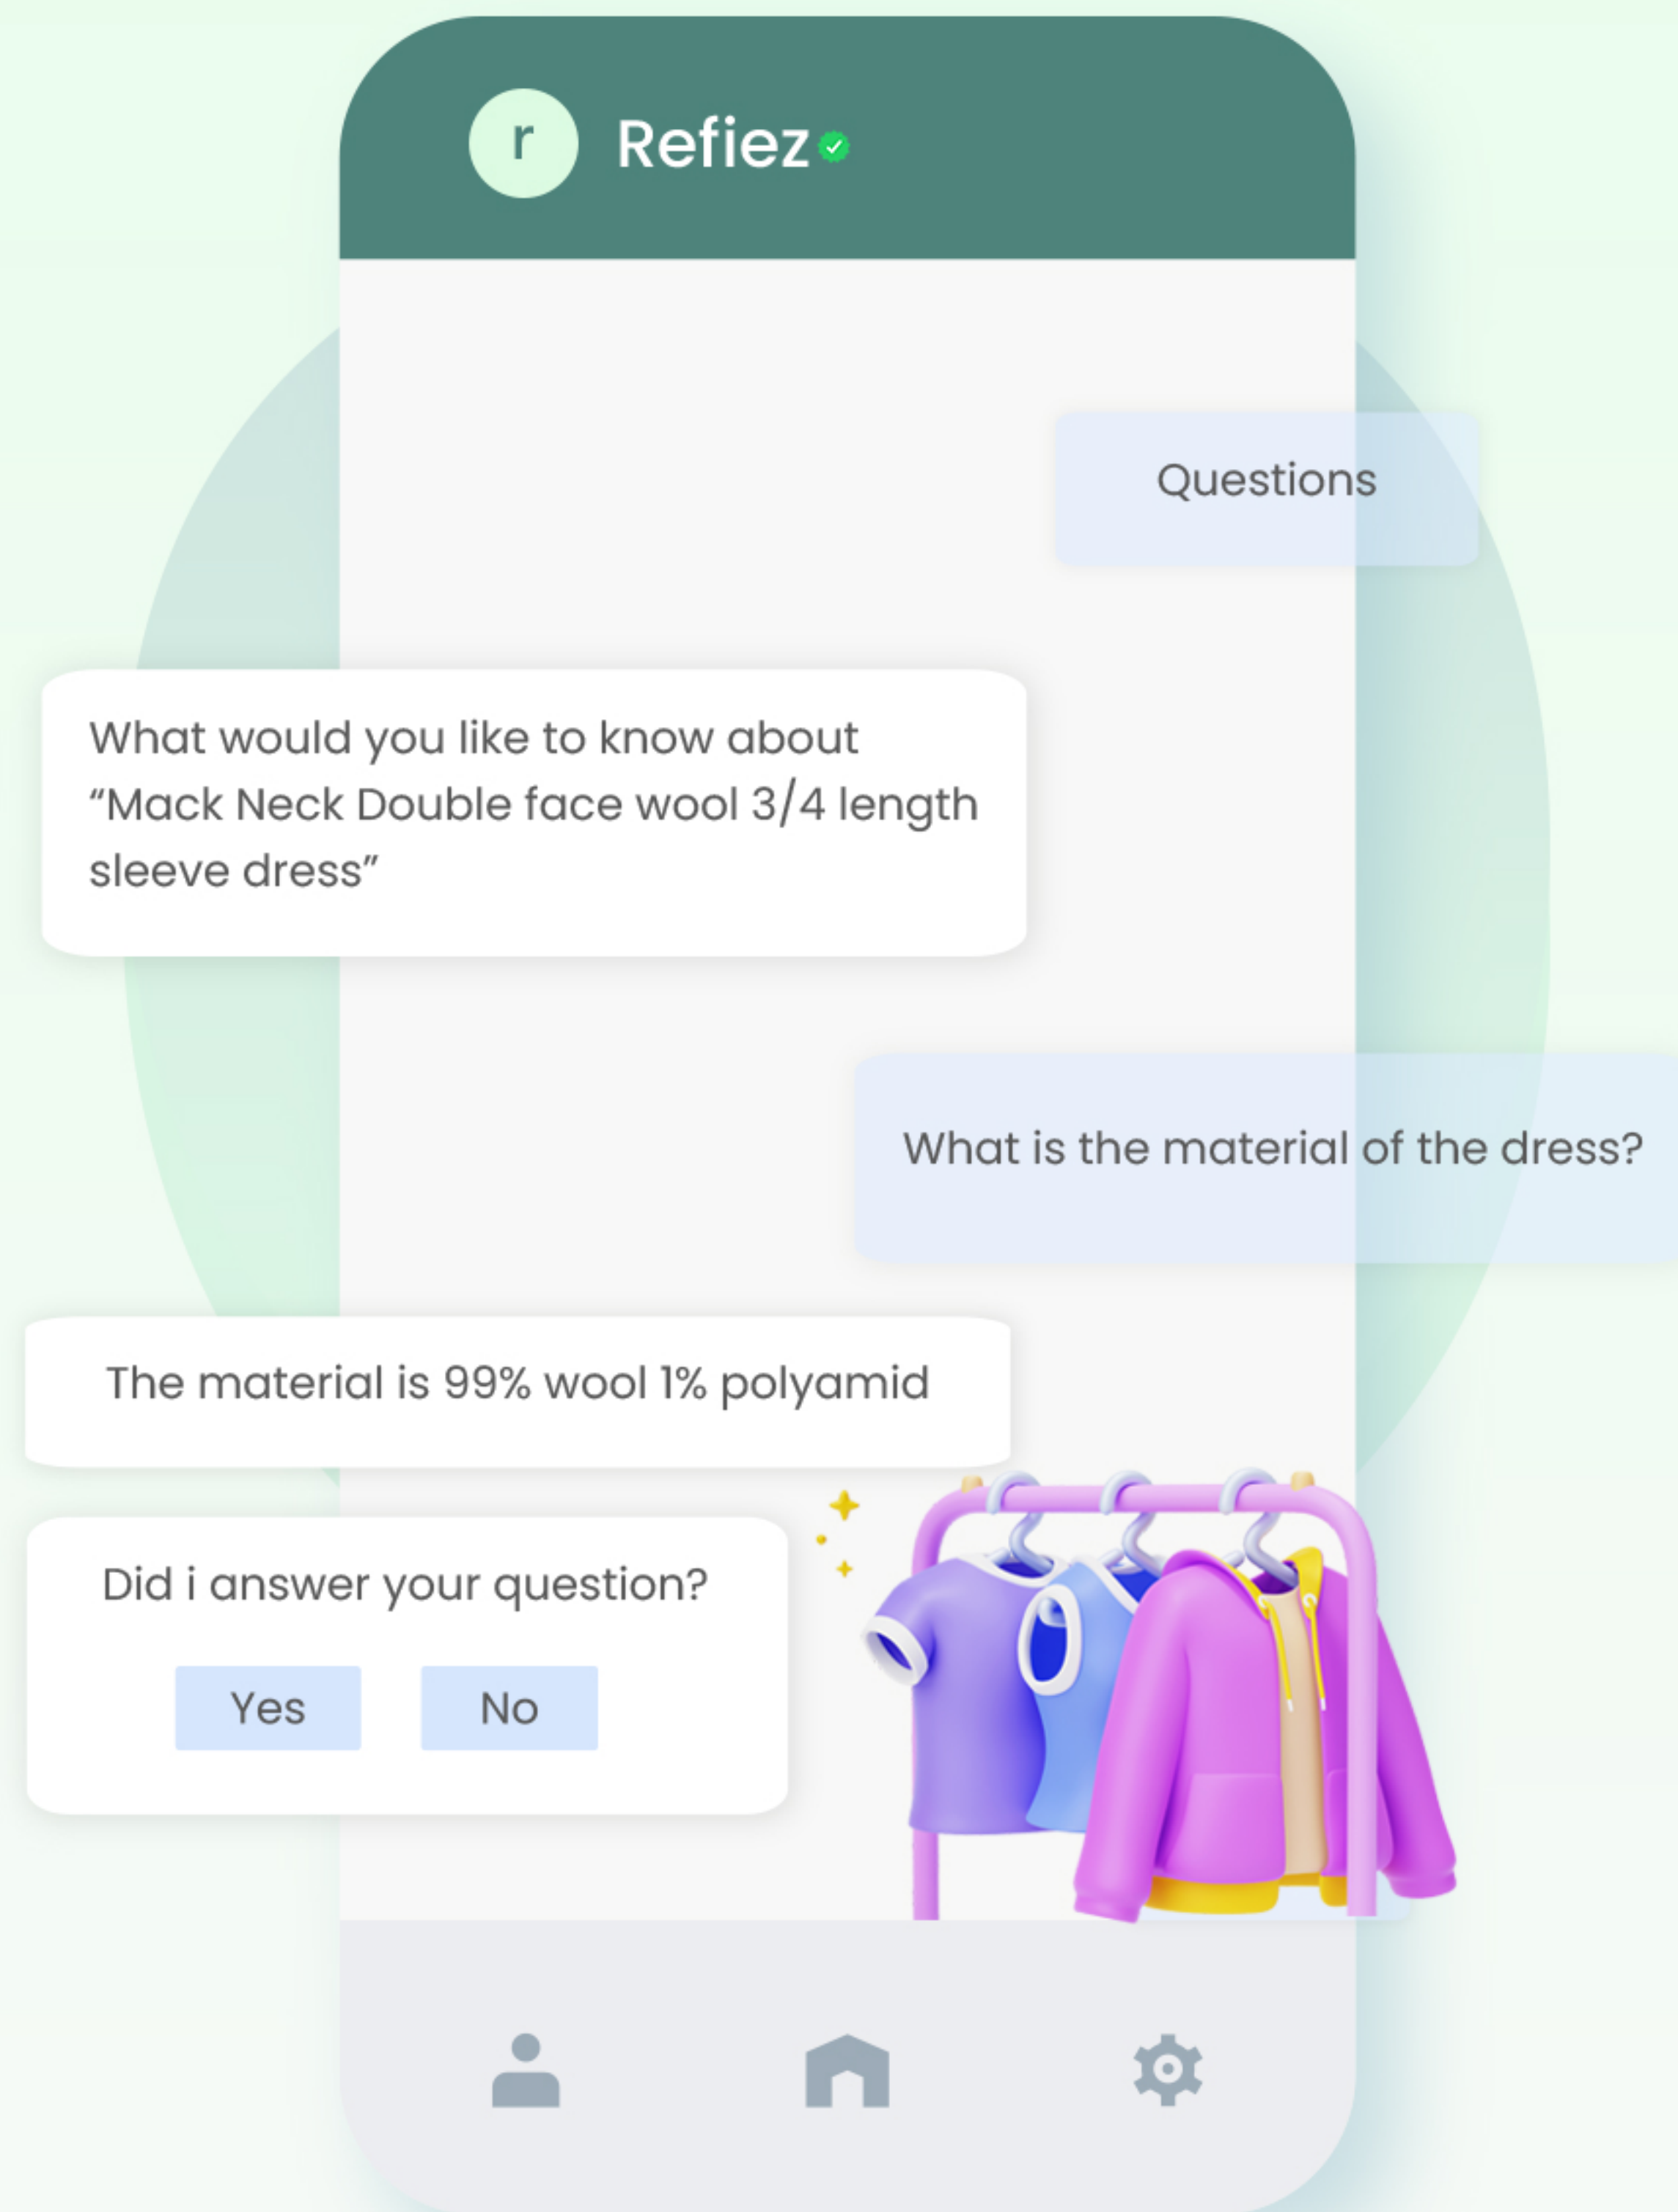

Deliver expert guidance anytime, anywhere, and sell more with a personalized and easy-to-navigate shopping experience on chat

## Move shoppers through the funnel faster

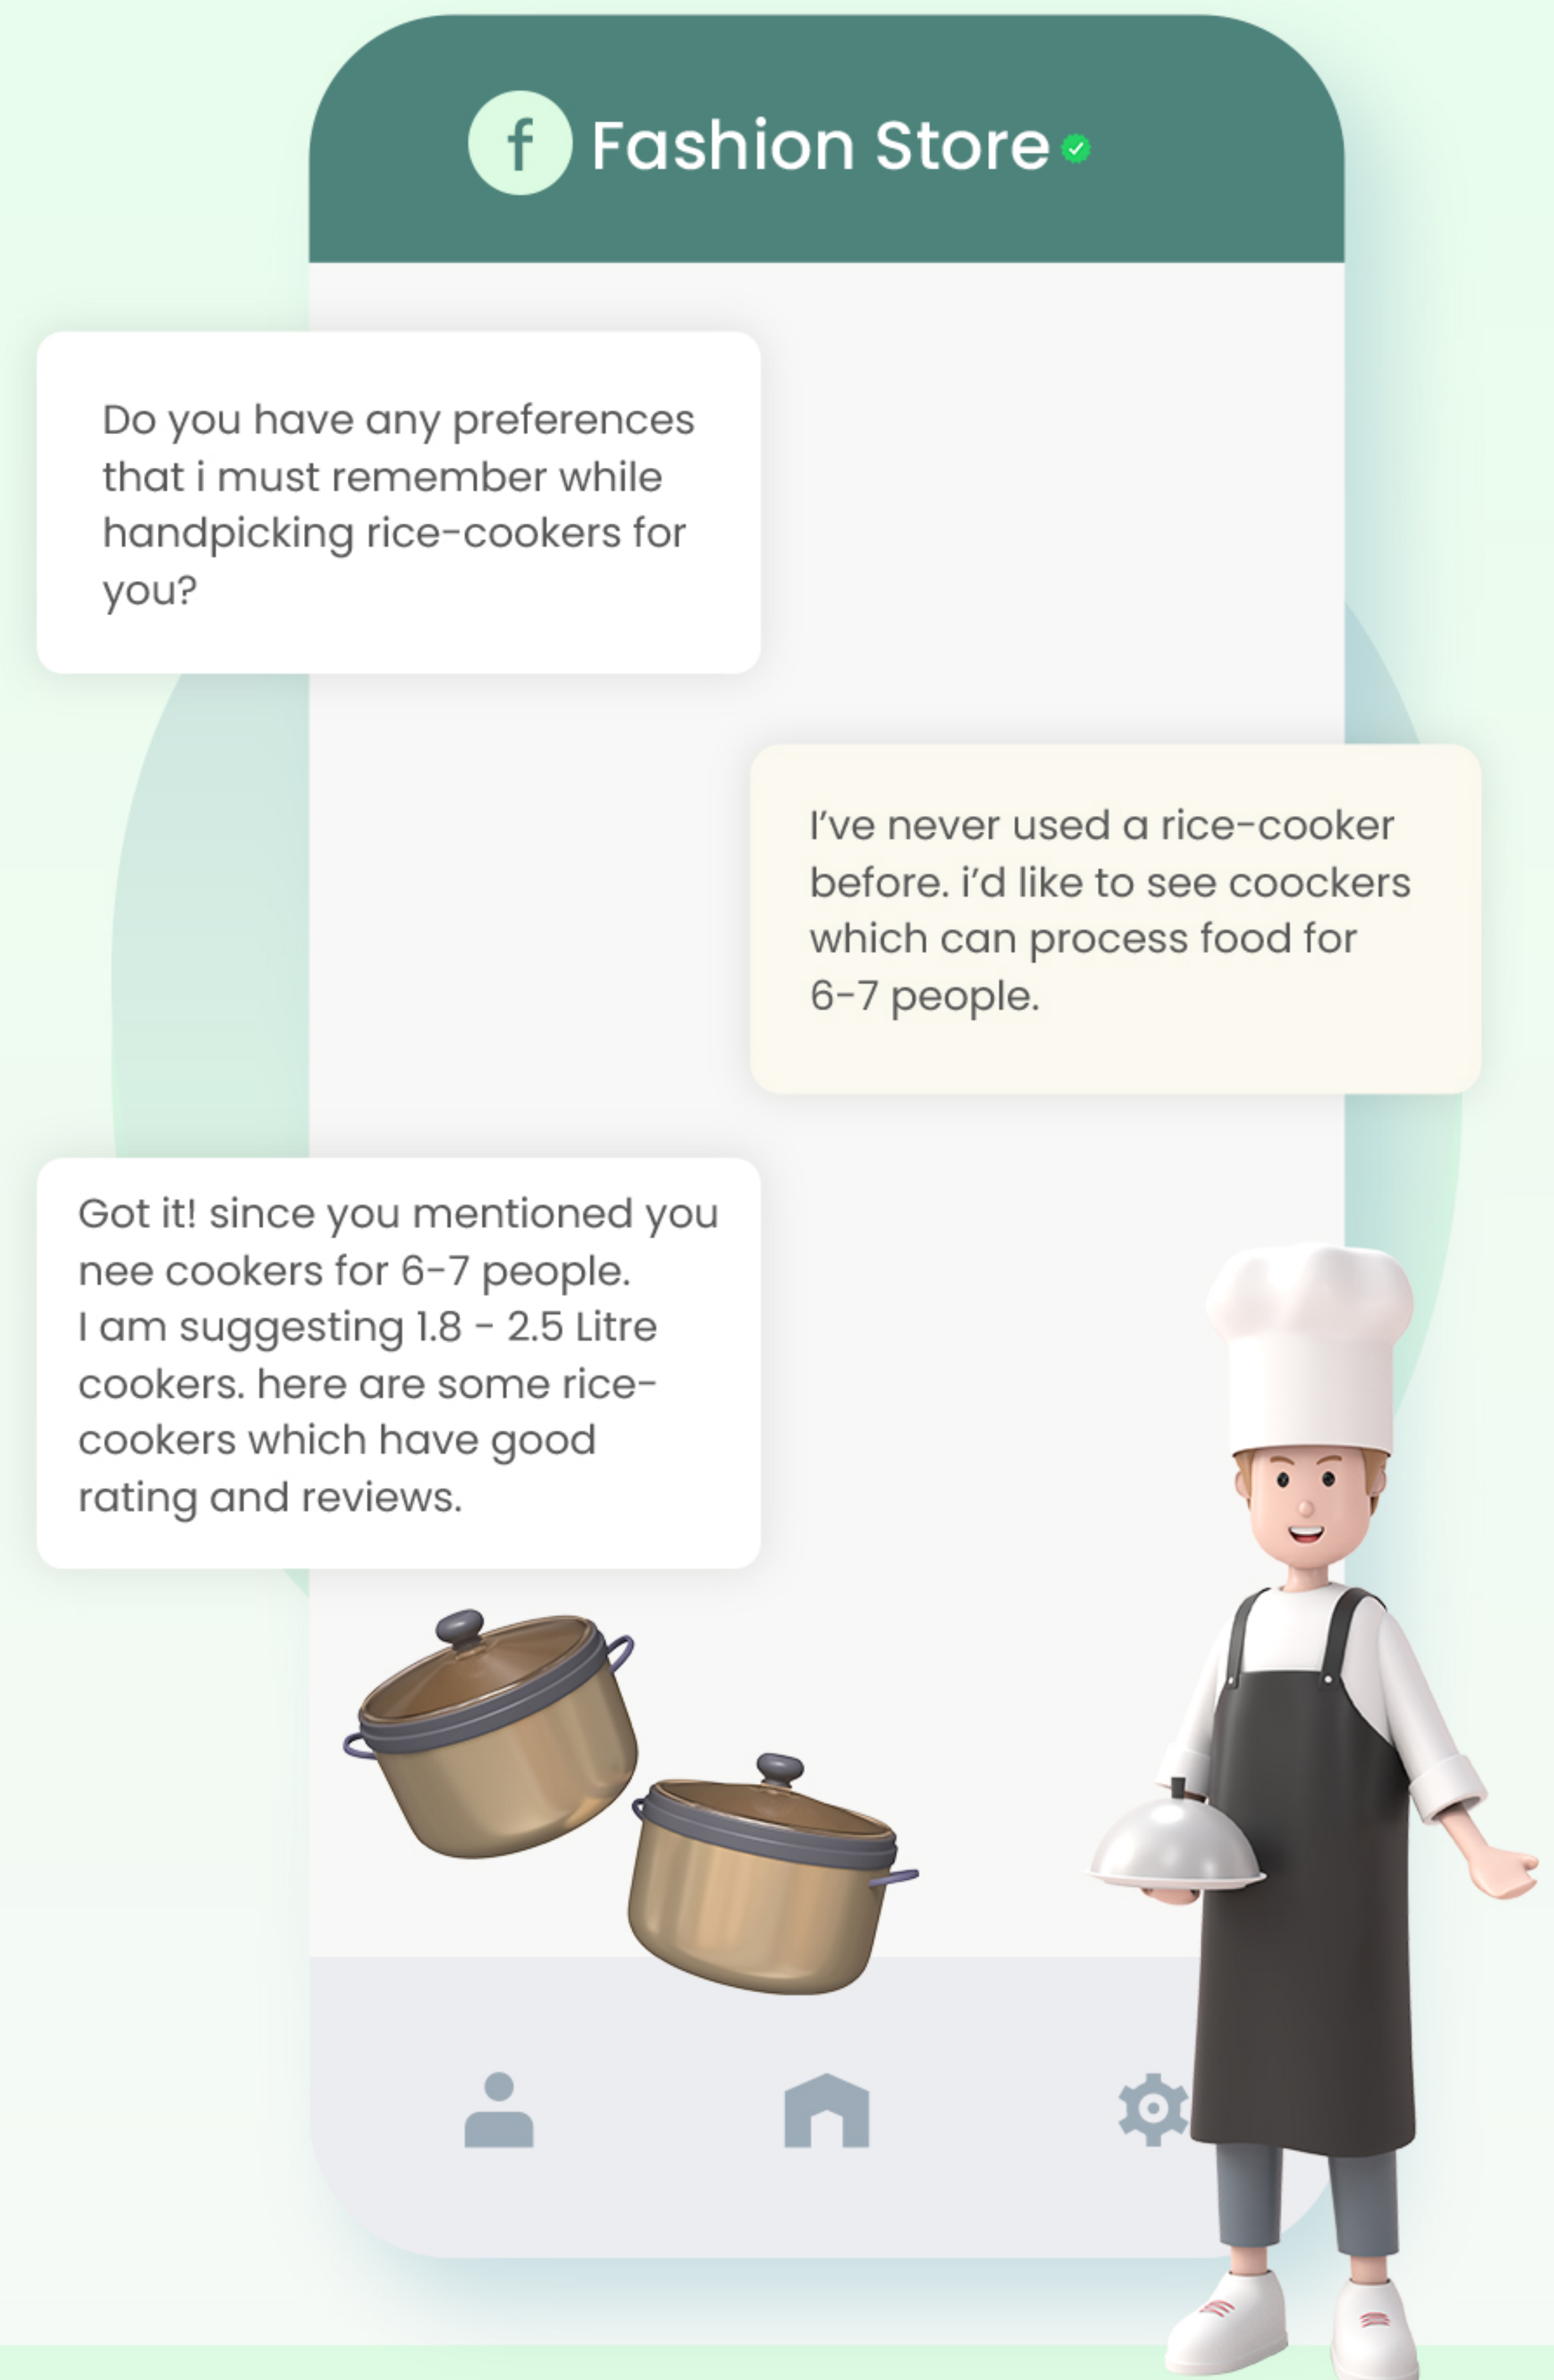

- Allow customers to discover products by searching with keywords or stating their needs in natural language
- Create a personalized experience based on browsing behavior, transactions and conversational data
- Show contextual offers and promotions to prompt purchases and action

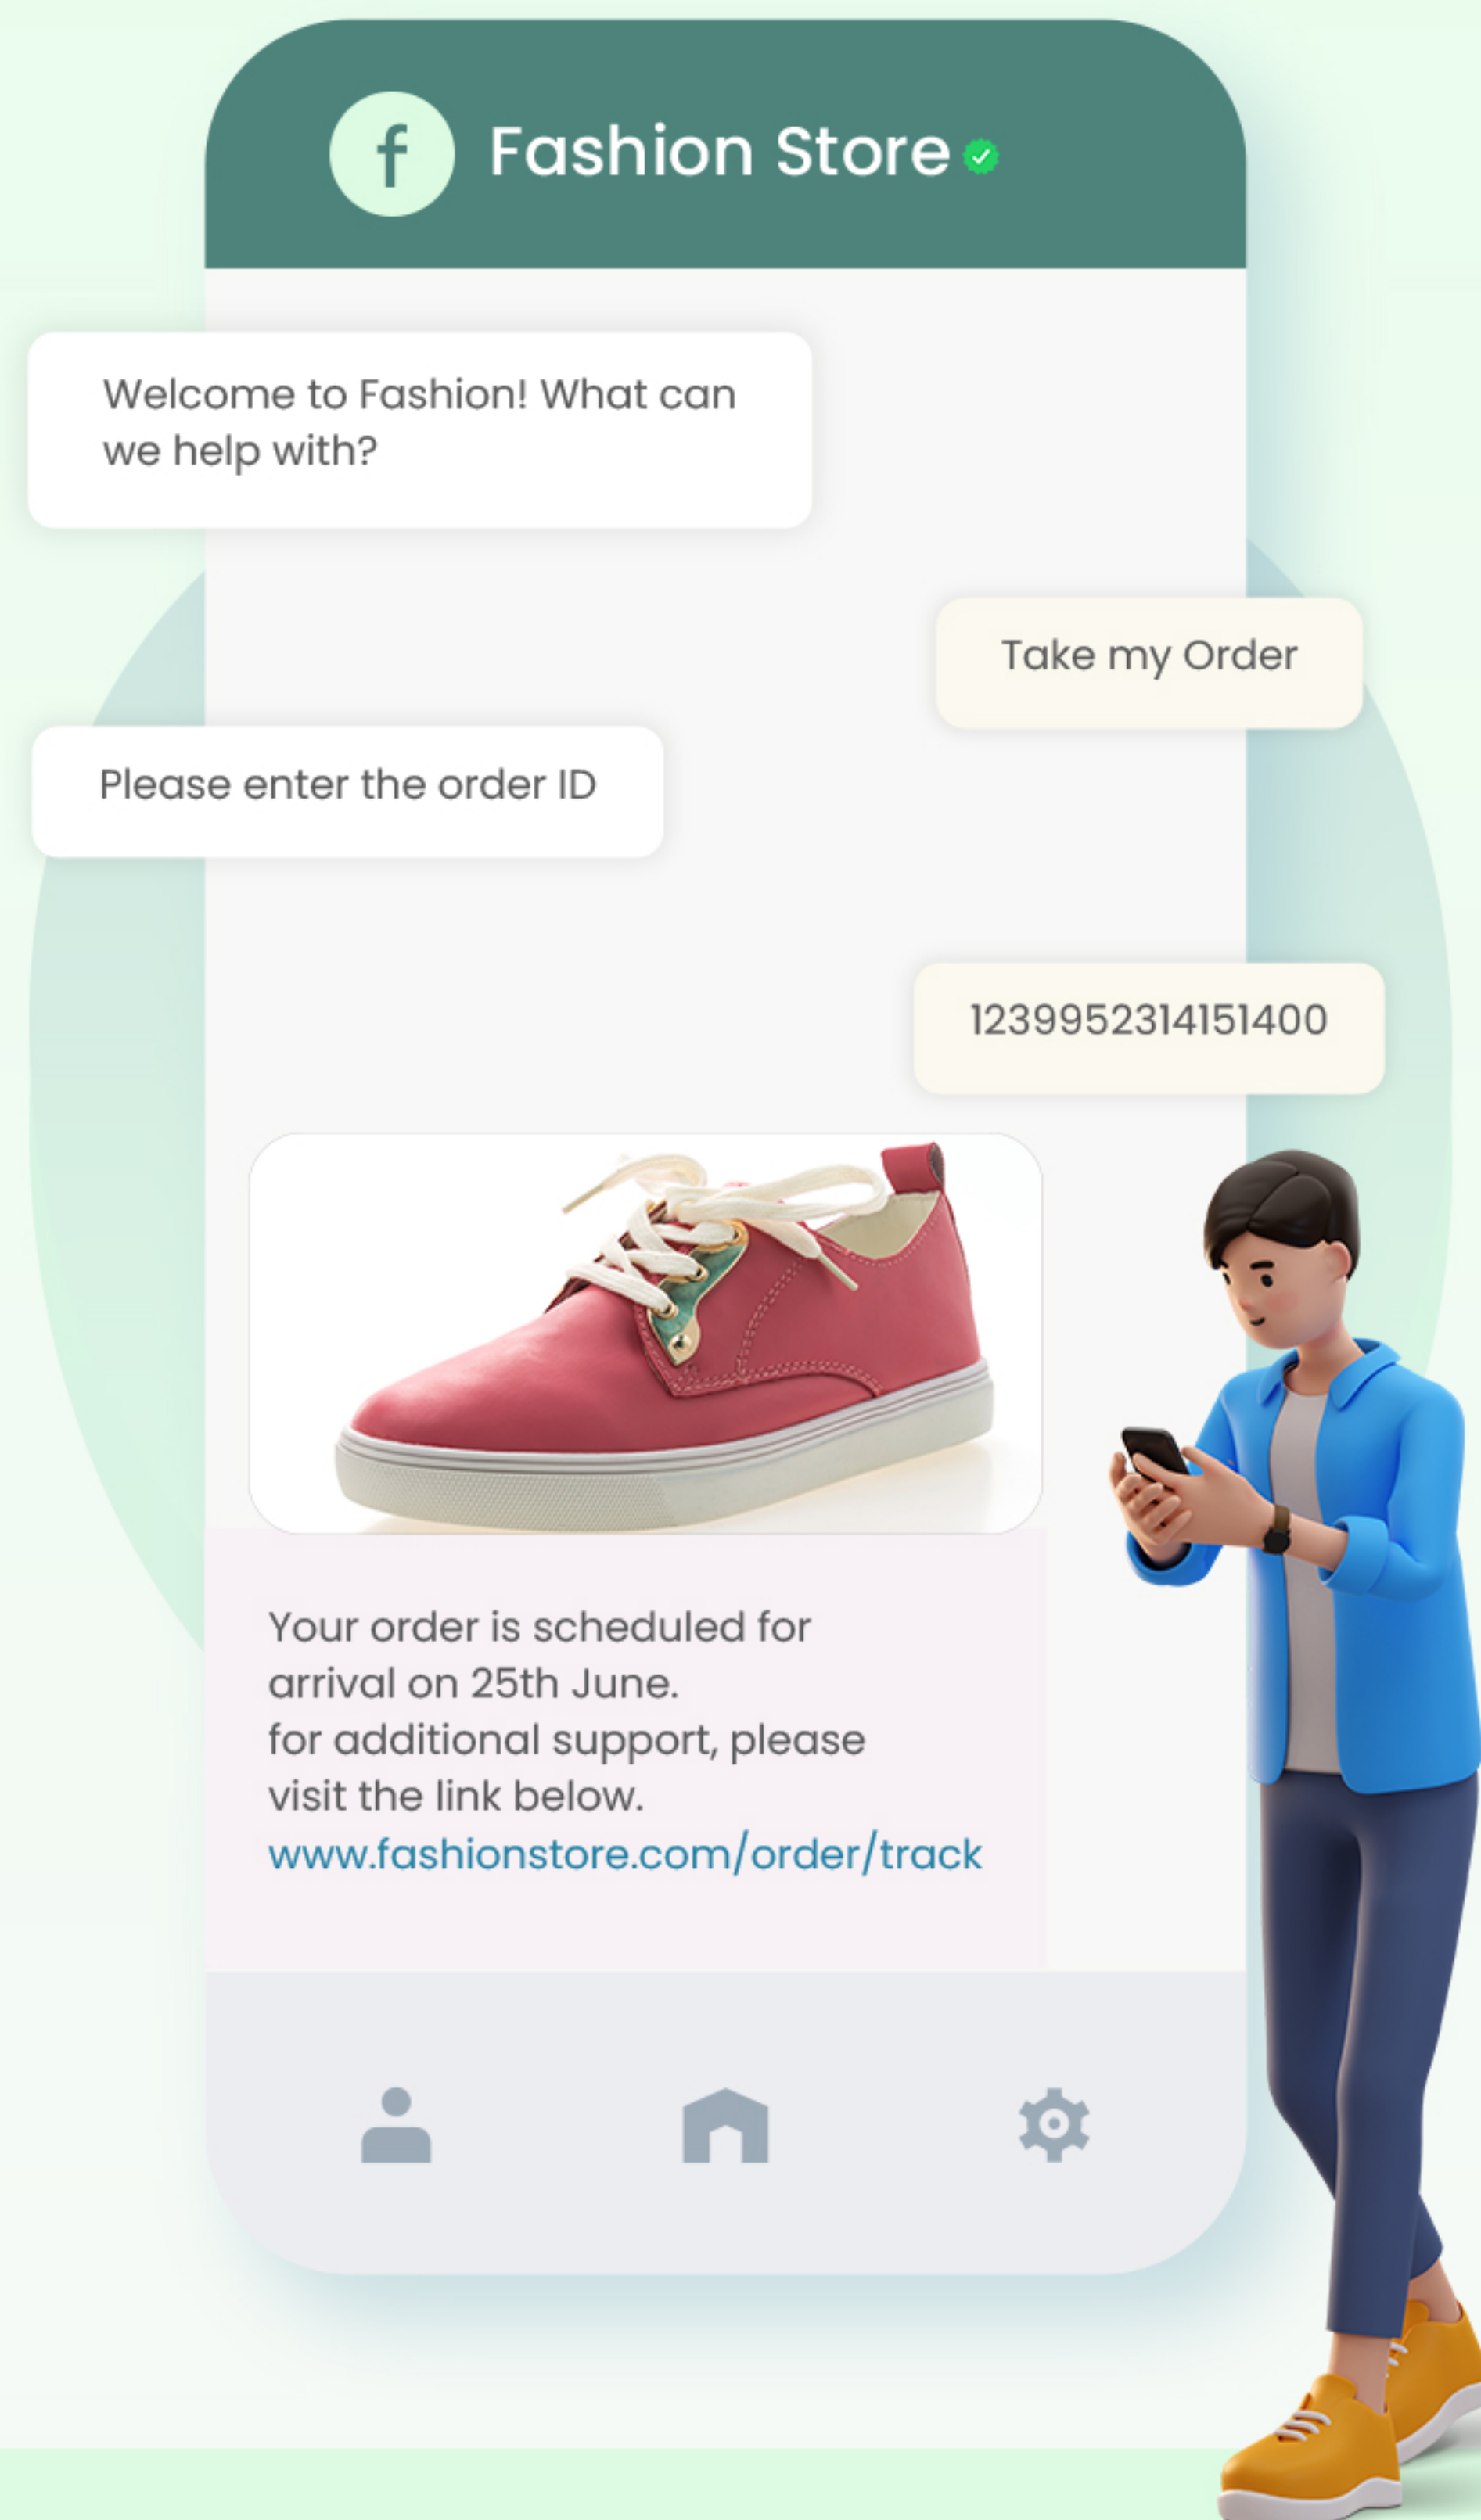

## Convert new visitors and increase CLTV

- Recommend products based on consumer preferences and their recency, frequency and monetary segment
- Send abandoned cart alerts and nudge on 30+ channels including WhatsApp and SMS, with easy payment links
- Drive repeat purchases with back-in-stock alerts, new arrivals, cross-sell suggestions and rebuy notifications

## Optimize costs and serve better with intuitive support

- Answer routine queries such as shipping status and payment status with AI automation
- Humanize the experience with intuitive text, voice, and video-based interactions for complex queries and concerns
- Interact in multiple languages, support 24\*7 and automate delivery updates, return and replacement requests

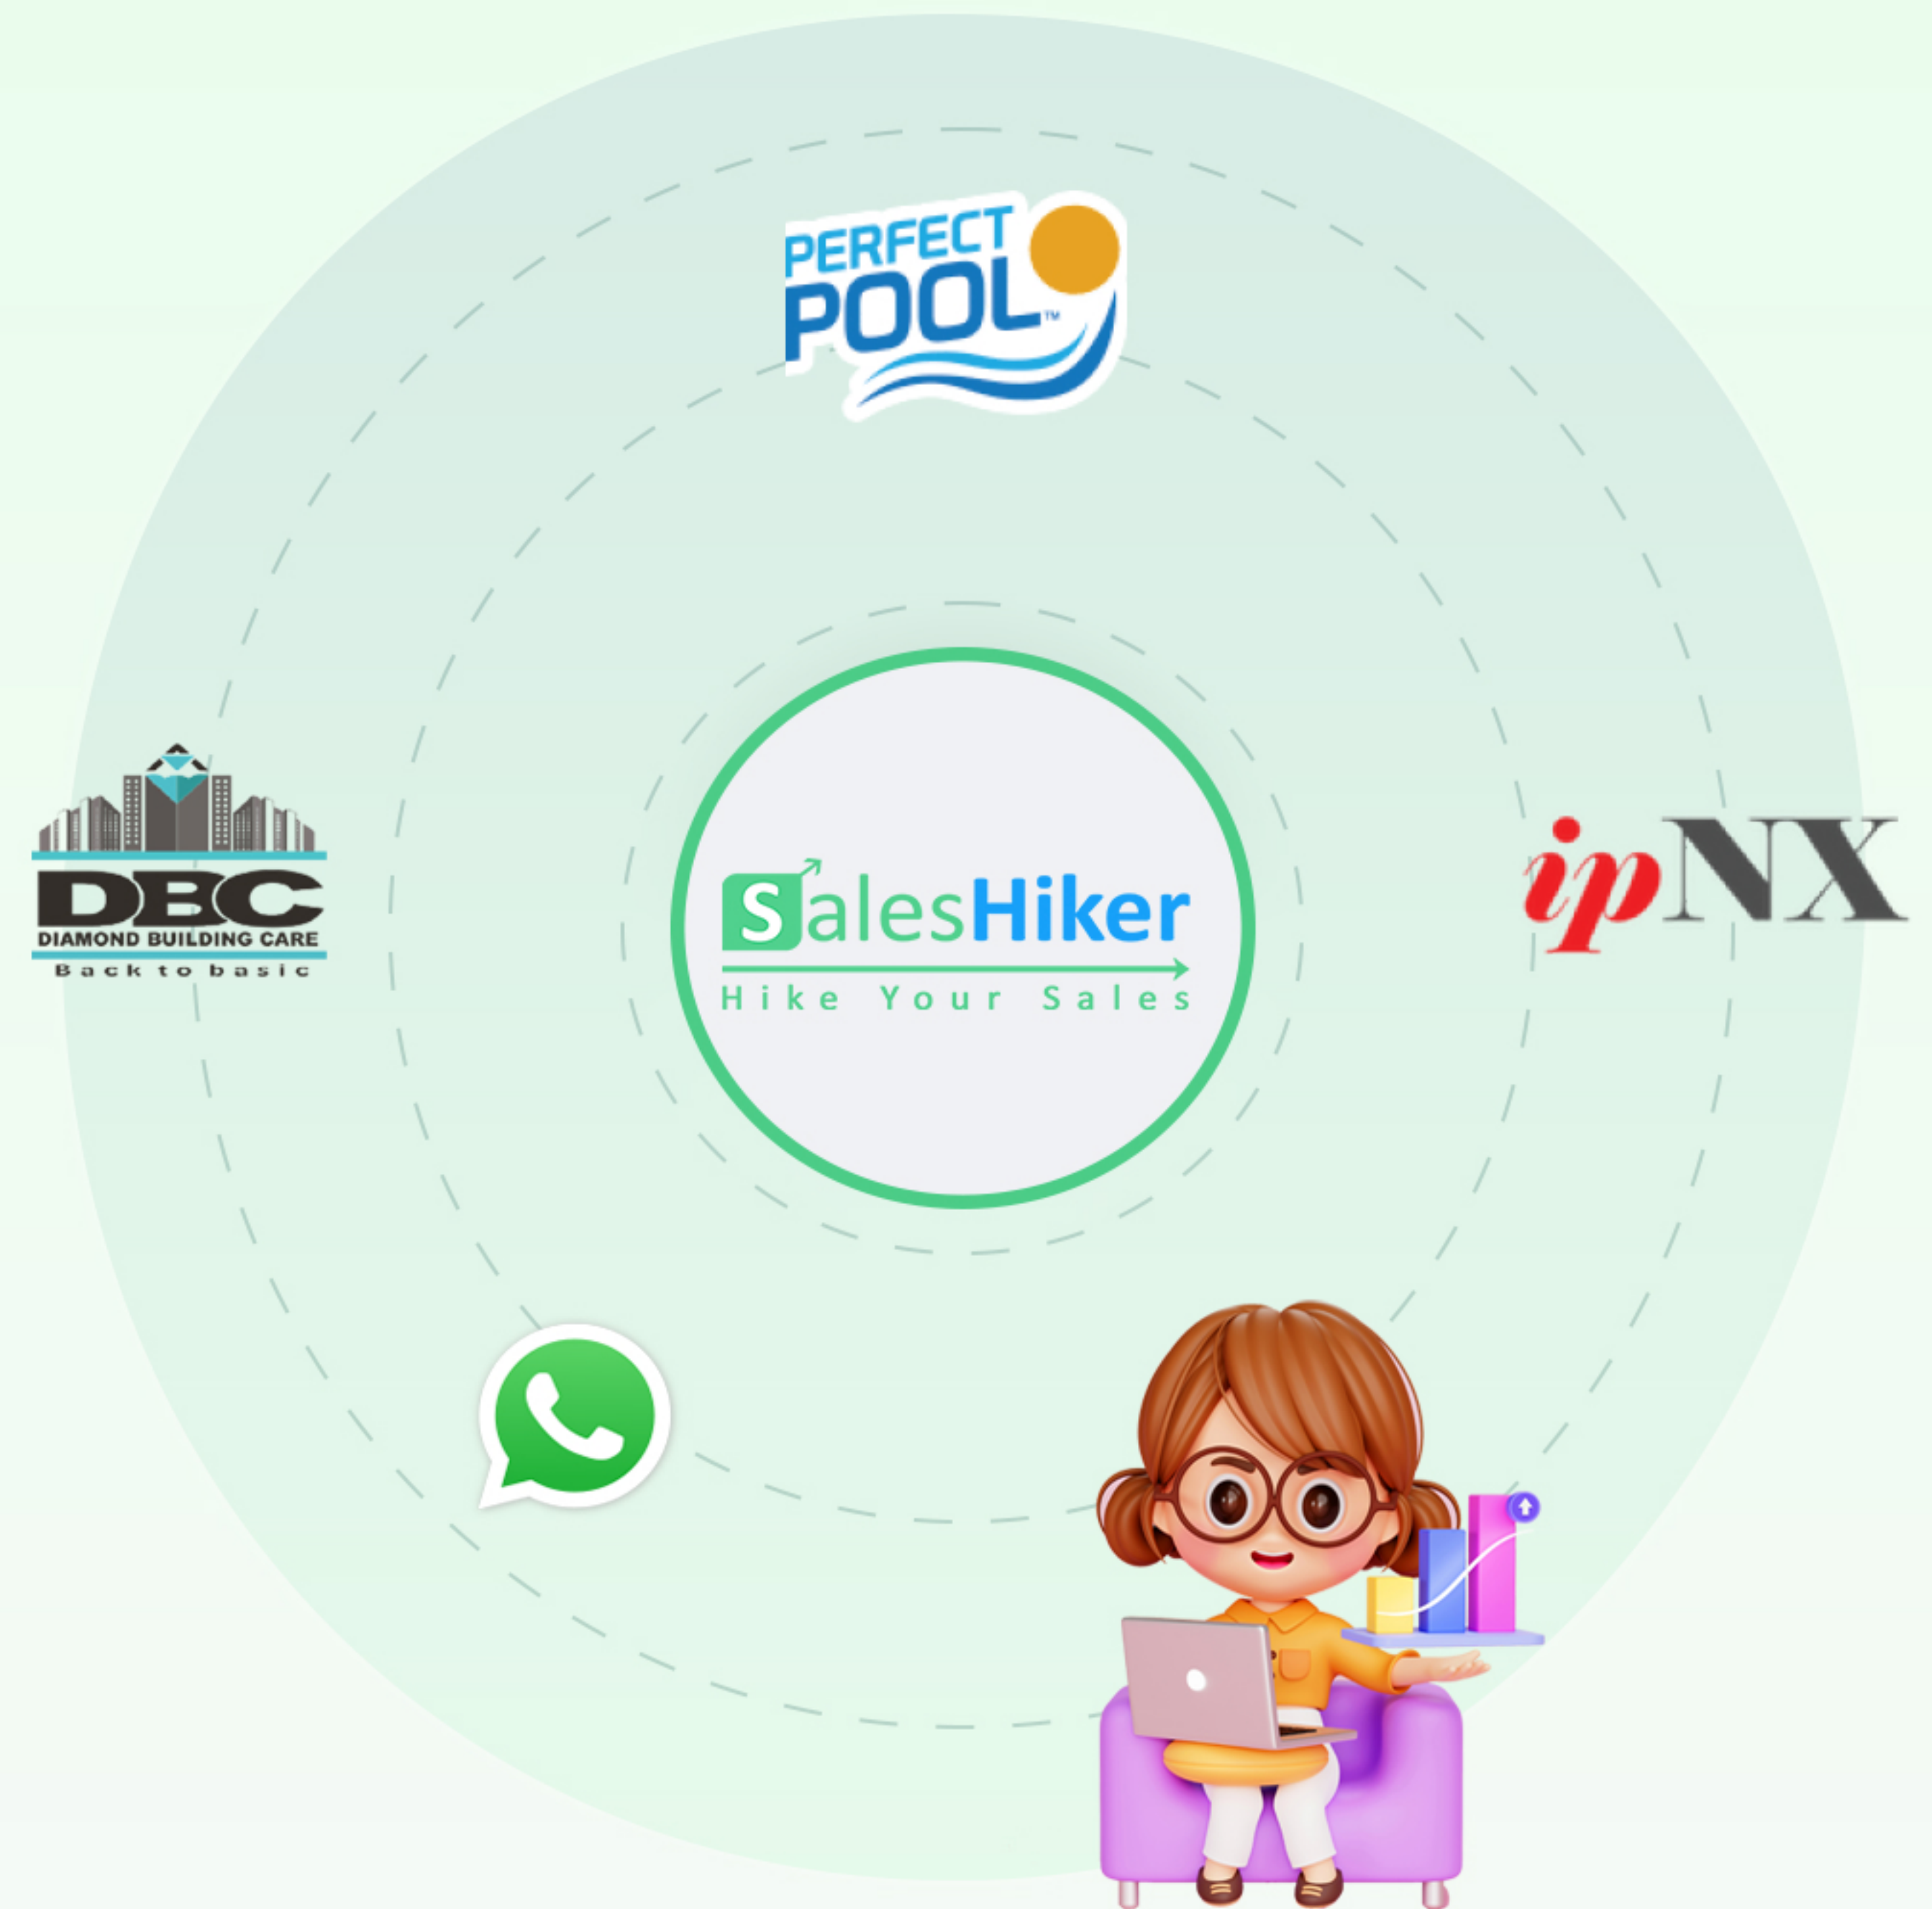

## Proud family of 500+ Happy customers

Over the years, we've had the privilege of serving over 500+ satisfied customers who have experienced the transformative impact of SalesHiker on their sales/marketing/support operations
